

Changpeng Zhao,

CEO Binance

„Blockchain will be bigger than the Internet“

Introduction

There's no doubt about the future cryptocurrency in finance. This technology will have a great extent in the days to come.

We are at a very important stage in the evolution of cryptocurrency because this technology is going to experience a great explosion in several areas for several reasons:

- It is the fastest way of payment and less fees.
- The blockchain has an ultra-secure system
- The only truly democratized payment method because it has neither borders nor racism.
- Cryptocurrency is also a great way to invest...

All of these reasons are going to drive great adoption in the near future.

There will therefore be three important movements in the adoption of cryptocurrency:

- The development of the crytosphere.

This is all the work devoted to the creation and development of cryptocurrency technology such as the development of the blockchain system, development of smart contracts etc...

- Adapting blockchain services to existing projects

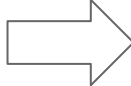

We will very soon be entering the "tokenization" phase, which consists of adapting the crypto currency to the old existing business. The use, for example, of cryptocurrency on an e-commerce store as payment methode perfectly illustrates what I call tokenization.

- The materialization of new innovative projects on the blockchain

I can't doubt for a moment that it's the end of the world! It will have many new projects that will be born as and when.

Cryptocurrency therefore has great potential in the years to come...

Dfferent problems and needs

Blockchain technology is still new , very difficult for employers
there are not enough developers  to find developer

Some developers are looking for new contracts but cannot find an employer.

During tokenization, employers need freelancers to do some tasks, but **there will be no specific place to find them as quickly as possible.**

Web3 shoop, Solution to the problem

Web3 shoop is a freelance platform dedicated to cryptocurrency to answer all these problems. It is an intermediary platform to connect crypto developers and freelancers to employees as efficiently as possible.

Web3 shoop (shop) token W3T

W3T is the cryptocurrency of the web3 shoop platform. It will be integrated among payment methods on our marketplace and part of the currency will be used to compensate our customers.

Token allocation

*Team: 20%

*Marketing and development 10%

*IDO 5%

*Private sale: 15%

Customer reward 2%

Staking 15%

*affiliate compensation: 5%

Partnership strategic 5%

Airdrop 2%

Public sale 20%

Total supply 1,000,000,000 W3T

Buy and sell tax

*Liquidity tax 4%

*Users reward 1%

*Buy back 3%

*For each transaction, 2% will be charged in order to reduce the token to drive up the price.
